Program Manager | PMO Architect | Technical | Operational | Strategic

SUMMARY

Program Manager and PMO Architect with 15+ years leading portfolio sequencing, system design, and cross-functional governance across Climate Tech, EV SaaS, and Enterprise SaaS. Built PMOs from zero, scaled portfolio operations through VC milestones, and implemented AI-driven systems before ROI was proven. Delivered outcomes including Series B enablement, 99%+ SLA, 95%+ uptime, zero P0/P1 incidents, and ~50% operational overhead reduction. Seeking full-time program leadership role.

CORE COMPETENCIES

Strategic PMO & Governance

Portfolio Management • PMO Architecture & Operating Models • Roadmaps & OKRs • Release Governance • Risk & Dependency Management • Executive Reporting • P&L Accountability • Agile & Waterfall Delivery • Milestone Reporting • Process Adoption • Change Management • Vendor Management

Technical Program & Project Leadership

Technical Requirements & System Design • SDLC Alignment • API & Integration Governance • SLA & Incident Management • Cross-Functional & Stakeholder Leadership

Systems Thinking & Data-Driven Operations

Operational Dashboards & Command Centers • Multi-System Integration (Slack, Jira, Monday.com, Stripe, proprietary apps) • KPI Tracking & Analytics • Process Optimization & Forecasting • Single Source of Truth • Data Reconciliation

AI Automation & Enterprise Platforms

Generative AI (ChatGPT, Claude) • Agentic Workflows • SQL/Python (ML & Forecasting) • AI Cost Governance • Jira • Confluence • Monday.com • ClickUp • Asana • Smartsheet • Salesforce • SAP • Cigo

PROFESSIONAL EXPERIENCE

Strategic Program Manager (Advisory & Transformation)

Remote | Austin, TX

Portfolio: (Series A/B Climate Tech & Enterprise SaaS)

Oct 2024 – Jan 2026

- Executed operational processes for portfolio of 15–20 active technology innovation projects; documented workflows (progress tracking, milestone reporting, stakeholder updates, executive dashboards) to enable AI-driven automation.
- Designed & built automation core: Architected and deployed AI-powered pipelines replacing manual workflows (data reconciliation, status tracking, report generation) across the portfolio.
- Established unified data foundation: Consolidated fragmented sources (spreadsheets, databases, slide decks, chat threads) into a centralized, automated data pipeline serving as a single source of truth.
- Built portfolio intelligence layer across engineering stack: Orchestrated Monday.com alongside Jira and version control systems to aggregate execution data into a unified AI-driven view of portfolio health, delivery risk, and resource utilization.
- Drove cross-functional adoption of automated workflows: Operationalized processes across hardware engineering teams, ensuring consistent usage through structured rollout, enablement, and technical integration planning.

Strategic Program Manager

KT Impact, LLC (Stealth Startup, EV SaaS)

Remote | Austin, TX
Mar 2023 – Jun 2024

- Built 0-to-1 platform infrastructure and PMO (Hybrid Agile at Scale), reducing time-to-launch 35%.
- Optimized AI model configurations (Claude, GPT-4) for reliability; reduced downtime 22% (8.5% → 6.6%) while sustaining 99%+ SLA.
- Enforced scope discipline across executive reporting, vendor governance, and roadmap planning; maintained budget control and delivery alignment.

Program Manager - Strategic Initiatives & Operations

Recyclops (Climate Tech, Series A to B Growth Stage)

Remote | Austin, TX
Aug 2021 – Mar 2023

- Led 0-to-1 NPI of gig-based aggregation platform across 25+ markets in 9 months (60% ahead of roadmap), achieving zero P0/P1 incidents and enabling Series B funding.
- Defined system design, technical requirements, and SLA enforcement under hyper-growth conditions; sustained 95%+ uptime across expansion.
- Replaced ad hoc execution with formal governance (dependency mapping, go/no-go gates, readiness frameworks), reducing launch cycles by 50%.
- Prioritized scalable full-stack infrastructure (billing, mapping, communications APIs, predictive routing, logistics integrations), reducing technical debt and operational overhead ~60%.
- Selected LLM APIs and predictive routing over traditional dispatch systems; achieved 18% cost reduction with sub-4-month ROI.
- Implemented Monday.com as an orchestration layer across Slack, Jira, and Stripe systems; improved cross-market visibility and reduced stabilization time by 30%.

Project Manager - Corporate Sales Enablement & Operations

YETI (Consumer Products, DTC/B2b)

Remote | Austin, TX
Jul 2020 – Aug 2021

- Redesigned Salesforce CPQ workflows, reducing quote-to-cash cycle time by 25% and eliminating revenue leakage.
- Integrated Salesforce and SAP data into a centralized Tableau reporting layer; improved forecast accuracy from 78% to 91%.

Project Manager to Product Owner (Operations/Digital Transformation)

FIFCO USA (Consumer Products)

Seattle, WA
Mar 2010 – Sep 2018

- Consolidated legacy systems into modern e-commerce CMS/CRM platforms, driving 28% revenue growth.
- Owned product P&L; optimized feature portfolio and exceeded revenue targets through OKR-driven execution.

EDUCATION & CERTIFICATIONS

MBA, Information Technology Management – Western Governors University, Expected April 2026
BA, Communications (Minor: Business) – University of Washington

Certifications: Google Project Management, Google Data Analytics, Agile Project Management Targeted 2026:
PMP, PgMP, Lean Six Sigma
