Program Manager | PMO Architect | Technical | Operational | Strategic

SUMMARY

Program Manager and PMO Architect with 15+ years of progressive ownership - from operations and digital transformation through technical and strategic enterprise program leadership - holding final authority on portfolio sequencing, system design, and cross-functional governance across Climate Tech, EV SaaS, and Enterprise SaaS. Made the hard calls others escalated and delivered every time. Built PMO infrastructure from zero, sequenced multi-market expansions against VC milestones, and bet early on GenAI before the ROI was proven. Outcomes owned: Series B funding enabled, 99%+ SLA reliability, 95% uptime with zero P0/P1 incidents, and 50% overhead eliminated. Most recently architected PMO frameworks and Responsible AI governance models across Series A through enterprise - now bringing that decision-making authority back into a full-time program leadership role.

CORE COMPETENCIES

Strategic PMO & Governance

Portfolio Management • PMO Architecture & Operating Models • Roadmaps & OKRs • Release Governance • Risk & Dependency Management • Executive Reporting • P&L Accountability

Technical Program & Project Leadership

Technical Requirements & System Design • SDLC Alignment • API & Integration Governance • SLA & Incident Management • Cross-Functional Leadership

Systems Thinking & Data-Driven Operations

Operational Dashboards & Command Centers • Multi-System Integration (Slack, Jira, Monday.com, Stripe, proprietary apps) • KPI Tracking & Analytics • Process Optimization & Forecasting

AI Automation & Enterprise Platforms

Generative AI (ChatGPT, Claude) • Agentic Workflows • SQL/Python (ML & Forecasting) • Automation Pipelines & Predictive Routing • Jira • Confluence • Monday.com • ClickUp • Asana • Smartsheet • Salesforce • SAP • Cigo

PROFESSIONAL EXPERIENCE

Strategic Program Manager (Advisory & Transformation)

Remote | Austin, TX

Portfolio: (Series A/B Climate Tech & Enterprise SaaS)

Oct 2024 – Jan 2026

- Replaced generic PMO templates with enterprise-grade frameworks, Responsible AI adoption playbooks, and governance models built for Series A/B capital constraints - formalized portfolio prioritization and C-suite decision rights, shortening planning cycles 25-30%.
- Locked in VC-aligned technical direction against capital efficiency targets and engineering capacity constraints, overriding misaligned sequencing proposals - increased deployment throughput 2-3x through targeted AI workflow automation.
- Cut manual reporting entirely and bet on agentic AI pipelines across ClickUp, Asana, and Monday.com - eliminated approximately 50% of reporting overhead and strengthened operational cadence across distributed teams.

Strategic Program Manager

Remote | Austin, TX

KT Impact, LLC (Stealth Startup, EV SaaS)

Mar 2023 – Jun 2024

- Committed to full 0-to-1 platform infrastructure and inaugural PMO using Hybrid Agile at Scale, rejecting incremental patching - defined strict technical constraints, SLA thresholds, and release governance, stabilizing delivery and reducing time-to-launch 35%.

- Tightened AI model selection to precise Claude/GPT-4 routing parameters over broader alternatives, trading flexibility for reliability - reduced downtime 22% (8.5% to 6.6%) while sustaining 99%+ SLA reliability under growth pressure.
- Held final authority on executive reporting, vendor governance, and multi-quarter roadmap execution across engineering and product - blocked scope creep and ungrounded pivots, ensuring budget adherence and controlled delivery.

Program Manager - Strategic Initiatives & Operations

Remote | Austin, TX

Recyclops (Climate Tech, Series A to B Growth Stage)

Aug 2021 – Mar 2023

- Prioritized operational readiness for hyper-scale, implementing readiness gates and governance for reliable market launches. Scaled ReDyper from 3 to 25+ markets in 9 months—60% ahead of roadmap—with zero P0/P1 incidents, enabling Series B funding.
- Held final authority on system design, technical requirements, and SLA enforcement, blocking unscalable approaches under hyper-growth pressure - sustained 95%+ uptime and zero P0/P1 incidents across the entire expansion.
- Dismantled ad-hoc launch processes entirely and built formal governance from scratch - instituted dependency mapping, go/no-go gates, and readiness checks that cut launch prep cycles 50% and enabled repeatable execution at scale.
- Prioritized full-stack infrastructure build (billing/mapping/comms APIs, predictive routing engines, logistics integrations) over incremental fixes - cut technical debt and launch overhead approximately 60%.
- Bet on early LLM APIs and predictive workflows over traditional methods for 0-to-1 NPI on a climate tech gig platform - delivered 18% cost reduction with under 4-month ROI.
- Replaced siloed tracking with tiered Monday.com command centers integrated across Slack, Jira, Stripe, and proprietary apps - gave executives real-time visibility and cut post-launch stabilization issues 30%.

Project Manager - Corporate Sales Enablement & Operations

Remote | Austin, TX

YETI (Consumer Products, DTC/B2b)

Jul 2020 – Aug 2021

- Contributed to Salesforce CPQ redesign and system mapping overhaul - compressed quote-to-cash cycles 25% and eliminated revenue leakage from misaligned quotes.
- Unified fragmented Salesforce and SAP data into a single real-time Tableau intelligence layer, scrapping siloed reporting - raised forecast accuracy from 78% to 91% and accelerated executive decision cycles 35%.

Project Manager to Product Owner (Operations/Digital Transformation)

Seattle, WA

FIFCO USA (Consumer Products)

Mar 2010 – Sep 2018

- Drove full consolidation of legacy systems into a unified e-commerce CMS/CRM stack, rejecting partial upgrades - delivered 28% e-commerce revenue growth and eliminated multi-channel operational friction.
- Took on full P&L ownership as Product Owner and repeatedly cut underperforming features to protect margins - exceeded annual revenue targets consistently through structured OKR roadmaps and disciplined prioritization.

EDUCATION & CERTIFICATIONS

MBA, Information Technology Management – Western Governors University, Expected April 2026

BA, Communications (Minor: Business) – University of Washington

Certifications: Google Project Management, Google Data Analytics, Agile Project Management Targeted 2026: PMP, PgMP, Lean Six Sigma
