EXPERIENCE

PROGRAM MANAGER, SYSTEMS IMPLEMENTATION & DELIVERY

Independent Consultant | Austin, TX — Oct 2024–Feb 2026

Directed enterprise systems implementation for Series A–C SaaS and hardware clients, translating business priorities into integrated tooling, workflow automation, and delivery plans from discovery through cutover and adoption.

- Delivered a Monday.com–Jira integration for a hardware engineering organization, defining object models, field mappings, synchronization rules, and validation logic with the technical team; coordinated development, integration testing, and cutover.
- Achieved 90% user adoption through phased enablement and change management, with adoption sustained after operational handoff.
- Consolidated 12 reporting sources into one executive dashboard, eliminating manual reconciliation and standardizing program KPI reporting.
- Implemented AI-enabled status-reporting workflows across three engagements, reducing reporting overhead by 50%.
- Governed intake and prioritization across 15–20 concurrent initiatives, aligning business cases, budgets, scope, and delivery criteria; formalized executive decision rights and shortened planning cycles by 25–30% across three engagements.

PROGRAM MANAGER, PLATFORM DELIVERY & ENTERPRISE IMPLEMENTATION

KT Impact, LLC | Austin, TX — Mar 2023–Jun 2024

Developed the strategy and execution framework for a new commercial EV platform matching freight lanes with charging availability. Connected platform development, systems integration, and enterprise fleet onboarding across Product, Engineering, Data, and Operations, with authority over budget, vendor selection, and roadmap sequencing.

- Directed platform delivery from initial development through enterprise implementation, reducing time-to-launch by 35% and onboarding 10+ enterprise fleet accounts.
- Defined API contracts, data schemas, and integration requirements with Engineering across telematics, routing, and charging-network feeds to support enterprise fleet onboarding.
- Established release cadence, capacity planning, scope controls, and SLA thresholds, aligning engineering delivery with customer implementation requirements and production readiness.
- Instituted weekly engineering triage prioritized by customer impact, resolving cross-team blockers and reducing production downtime from 8.5% to 6.6%.

PROGRAM MANAGER, STRATEGIC INITIATIVES & OPERATIONS

Recyclops | Austin, TX — Aug 2021–Mar 2023

Architected the program strategy and delivery infrastructure for new enterprise product and service models, including ReDyper. Connected platform development, partner integrations, data flows, and operational readiness, with accountability for market sequencing, readiness criteria, and launch go/no-go decisions.

- Scaled a gig-aggregation platform from three to 25+ markets in nine months, 60% ahead of roadmap, coordinating platform development, systems integration, and operational readiness with zero P0/P1 incidents.
- Converted the national expansion strategy into a repeatable launch framework with market sequencing, dependency maps, critical paths, readiness gates, and accountable workstream owners; halved time-to-launch.
- Unified a concurrent platform rebuild and live market expansion under one delivery plan, aligning Product and Engineering backlogs, integration dependencies, and release sequencing through Scrum and Kanban within a waterfall release schedule.
- Delivered API-based integrations across Monday.com, Jira, Slack, Stripe, and partner systems, defining data flows and reconciliation rules to automatically synchronize launch status, dispatch, and billing.

- Established data governance across schema definitions and reconciliation rules; instrumented ingestion and parsing workflows that transformed routing, geofence, and partner datasets into executive dashboards.
- Developed scenario-modeling and resource-allocation workflows for capacity planning across 25 markets, reducing operating costs by 18% with payback within four months.

PROJECT MANAGER, CORPORATE SALES ENABLEMENT & OPERATIONS

YETI | Austin, TX — Jul 2020–Aug 2021

- Delivered a Salesforce CPQ workflow rebuild across B2B wholesale and direct-to-consumer retail, translating commercial requirements into pricing rules, approval logic, configuration, and testing; reduced quote-to-cash time by 25% and addressed revenue leakage.
- Defined the Salesforce and SAP-to-Tableau reporting pipeline and reconciliation logic, resolving conflicting revenue records and improving forecast accuracy from 78% to 91%.
- Unified enablement operations across six business units through shared systems, standardized processes, and coordinated change management.

CAREER BREAK, PERSONAL GOAL PURSUIT

Austin, TX — Oct 2018–Jun 2020

PROJECT MANAGER, THEN PRODUCT OWNER, OPERATIONS & DIGITAL TRANSFORMATION

FIFCO USA | Seattle, WA — Mar 2010–Sep 2018

- Delivered a phased legacy-to-CMS/CRM migration across retail and distributor channels, from business case and executive approval through requirements and go-lives, contributing to 28% e-commerce revenue growth.
- Exercised P&L and roadmap authority as Product Owner; coordinated investment, vendor-contract decisions, release sequencing, and go-live readiness across Operations, Engineering, and Marketing.
- Established organizational readiness through process redesign, role-based training, documentation, and adoption tracking.

EDUCATION & CERTIFICATIONS

MBA, Information Technology Management | Western Governors University — 2026

BA, Communications; Minor: Business | University of Washington

Google Project Management | Google Data Analytics | Agile Project Management

TECHNICAL & DELIVERY SKILLS

Systems & Delivery: Enterprise implementation, API contracts, data schemas, integration testing, data governance, reconciliation, reporting pipelines, roadmap sequencing, release readiness, cutover planning, incident and SLA management, budget and vendor management, risk and dependency management, workflow automation, change management.

Tools & Methods: SQL, Python, Salesforce, SAP, Tableau, Jira, Confluence, Monday.com, GitHub, Smartsheet, Microsoft Project, Agile, Scrum, Kanban, Waterfall.
